

GOALIE-FRIENDLY PRACTICE CHECKLIST

Read & React

- ☐ Is the goalie involved from the start?
- ☐ Does the drill include a realistic game read?
- ☐ Does the goalie have to read the play and make a decision?
- ☐ Is there variability between repetitions?

Game Realism

- ☐ Are the shots and scoring chances game-like?
- ☐ Does the drill allow for appropriate depth and movement?
- ☐ Does the goalie track the puck through traffic?
- ☐ Are rebounds or second opportunities included?

Development

- ☐ Does the goalie have an opportunity to communicate?
- ☐ Is the goalie developing without taking away from the skaters' objective?
- ☐ Is the goalie receiving meaningful, not just high-volume, repetitions?
- ☐ Can one small constraint make the drill more game-like?
- ☐ Would this realistically happen in a game?
- ☐ Is the goalie receiving enough rest between repetitions?

GREAT drills allow the goalie to read, decide, execute, and have fun!
